

EARLY SCREENING FOR DOWN'S SYNDROME

HEALTHCARE FOR WOMEN and its
DEPARTMENT OF HEALTHY IMAGES

is pleased to announce certification by the
**NUCHAL TRANSLUCENCY REVIEW
PROGRAM** for the performance of the latest
in early screening for fetal abnormalities,
utilizing ultrasound to measure baby's Nuchal
Translucency and a drop of blood from mother's
finger at eleven weeks gestation.

The ultrasound will be performed
by our sonographer, Paula
Brandon, RDMS, who has
19 years experience and
who has previously
worked at Salinas
Valley Memorial
Hospital and UCSF.

The blood will
be analyzed by
Genzyme.
