

## Not so fast!

We know, it sounds a little ironic given the fact that we sell high-speed Internet services.

And sure, we'd love it if you leapt at the chance to order one of our T1 lines in the next ten minutes.

But first, we want to make sure you know what you're getting and why.

As you know, the Internet is swallowing up traditional business practices at a ferocious pace.

First it was access to huge data banks, then it was onsite servers and remote offices, and now it's voice. Put them together and multiply them by a 15, 25 or 50+ person staff and you've got a lot of online activity.

Not all high speed Internet connections were designed for that. But that's probably not news to you.

The T1 line was. Sure, it's not inexpensive, but if your relationship with the Internet is mission-critical, it's the cheapest insurance you'll ever buy.
