

YOU HAVE EVERYTHING TO LOSE.

Obesity puts you at risk

for these serious health conditions. If you meet certain requirements and all your attempts at serious weight reduction have failed, you may be a candidate for bariatric surgery — a procedure that can help you lose weight, be more active, and regain your health.

Community Hospital has just been designated a Bariatric Surgical Center of Excellence by the American Society for Bariatric Surgery. Our program is designed to support you emotionally and physically throughout your entire experience. Talk to your doctor to see if bariatric surgery might be right for you.
